Feasibility Study  
Revised Draft Report - Errata  
May 27, 2008

EPA Region 5 Records Ctr.

313813

The following errata address items in Section 8 (**Development and Evaluation of Remedial Action Alternatives – Sediment**) in the *Revised Draft Report – Feasibility Study – Ashland/Northern States Power Lakefront Superfund Site* dated May 15, 2008. These errata reflect costing changes that were made to the FS tables and Appendix F but were inadvertently not also changed in the text. The following highlighted (and underlined) portions to the text should be changed in the respective sections.

**8.3.2.6**      *Cost*

The cost for this alternative is estimated at approximately \$37,000,000. Various cost elements are summarized in Table 8-2.

**8.3.3.6**      *Cost*

The total cost for this alternative ranges from approximately \$30,100,000 to \$41,700,000

**8.3.4.4**      *Cost*

The total cost for this alternative ranges from approximately \$41,200,000 to \$61,100,000

**8.3.5.4**      *Cost*

The total cost for this alternative ranges from \$67,600,000 to 82,000,000 depending upon whether the sediment is thermally treated or not.
